

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

PREFACE.

THE Japanese Books and Manuscripts which form the subject of the present Catalogue have been brought together during many years and under various circumstances. The first contributions to the Library were contained in the Sloane, Cottonian, Harleian, and Banksian Libraries, but the first collection of any size or importance was that acquired by purchase from Herr von Siebold in July, 1868. In 1882 the magnificent collection of Works on Art, etc., gathered by Mr. William Anderson was bought; and two years later a collection of Books, printed at early periods in Japan and Korea, was purchased from Mr. (now Sir) E. M. Satow, who subsequently presented a number of other works of the same character. A further collection of Japanese Books in 1,284 volumes was purchased from Mr. William Anderson in 1894. In addition to these acquisitions, works have been purchased and presented in the usual course, until at the present time the Museum possesses upwards of 5,000 separate Japanese Works.

The entries in this Catalogue are arranged under the names of the Authors, when these occur, in alphabetical order. In cases where the Author's name does not appear on the title-page or in the body of the Work, the Book is catalogued under the name of any person or place which forms part of the title. But if no such name is to be found, the subject of the Work or the principal word in the title has been taken as a heading.

There is always a difficulty in transliterating Oriental words and names, and this difficulty is vastly increased in the case of Japanese owing to the system of writing adopted in Japan. As a rule, the names of Authors and the titles of their Works are given in Chinese characters. If these characters had fixed and definite values they would not present any serious difficulty. But the Japanese attach to each written character three or more sounds. Thus, a character may in the first place be taken as representing the native word which it signifies: for example, the Chinese character 山 *Sinice, Shan*, "a mountain," is to be pronounced *Yama*, the Japanese word for a mountain when used in that sense. But the character may also be read in accordance with the two dialectical pronunciations of the two districts from whence the Japanese derived their knowledge of Chinese, viz., the *Go-on*, or the pronunciation of the Eastern State of Wu, and the *Kan-on*, or that of the city and neighbourhood of Singan Fu, the capital of Shensi. Thus the same character (山) may also be read *Sen* or *San*.

But a Chinese character often has, in Chinese, many meanings, and it is therefore regarded in Japan as representing the corresponding Japanese words or expressions. For example, the Chinese character 經 *Ching* may be read "the warp," "the veins," "trade," "a book," "The Confucian Classics," "The Buddhist Sūtras," "habitual," "to pass," "to strangle," "to regulate." This one, therefore, is also read by the Japanese as *Tate*, *Suji*, *Akinai*, *Fumi*, *Kei*, *Kiō*, *Tsune*, *Furu*, *Kubiru*, and *Tadasu*.

From this system it is evident that unless the Cataloguer can recognize the meaning which the Author attaches to the character used, he may easily go astray, as is illustrated by the following incident. One of the best Japanese scholars we have was lately wishing to identify the original of a Japanese translation of an English novel. "Well, at all events," he said, holding the volume in his hands, "the first scene opens at Wapping." When the discovery of the original proved that that port had no place on the page, he pointed out with perfect accuracy that the characters which he had read "Wapping" might also mean "To resume the thread of my discourse."

The same difficulty follows in regard to proper names. Authors can practically call themselves by any name they please within the wide range of the adopted system. In fact, it is scarcely an exaggeration to say that in numerous instances it is impossible to be sure of the correct pronunciation of a proper name without knowing how the bearer of it wishes it to be pronounced. So acutely is this difficulty felt by the Japanese themselves, that when the first Parliament was established at Tōkiō it was enacted that the names of Members should be pronounced according to the Chinese pronunciation in vogue in Japan. But there is a still further complexity in dealing with the names of Artists and Authors, for it is customary for these to assume at different periods of their careers different sobriquets, under any of which they may be known, and under any of which their sketch-books and writings may be launched into the world. For example, the well-known Artist Hokusai was known at different epochs as Kintaisha, Shunrō, Tetsugoro, Tokitarō, Sori the Second, Hokusai Tatsumasa, Hokusaishi, Katsushika Hokusai, Katsushika Taito, Raishin, Tame-ichi, and Nan Rōjin. And his sketch-books are progressively signed indifferently by any one of these assumed names. Authors of literary works are equally reckless in the adoption of aliases; as, for instance, in the case of the greatest romancist of Japan, the celebrated Takizawa Kai, better recognized as Kiokutei Bakin, who at different periods was known to his friends and admirers as Teiyei Sanjin, Kuruwa no Makoto, Sakitsu, Saritsu, Kansai, Raisai, Shinten wo, Kiosai, Gushanjin, Gendō, and Chosakudō. But even this polyonymous Author is surpassed by Hayashi Gabō, who rejoiced in the possession of at least twenty-three different names.

Another difficulty with which the Cataloguer has had to contend has been the question of the orthography to be adopted for the transliteration of Japanese words. Hitherto in this matter every European writer on Japanese has been a law unto

himself. As an instance of this difficulty we may return to the Chinese word 經 *Ching* in the sense of a Buddhist Sūtra. In the first edition of Hepburn's Japanese Dictionary (1867) it is transcribed *Kiyō*, in the second edition (1886) it is written *Kyō*, and in Gubbins's very useful little "Dictionary of Chinese-Japanese Words in the Japanese Language" it is transliterated *Kiō*. Again, in the same way the Japanese syllable ズ is written respectively *Dz*, *Zu*, and *Dzu*; and so on with almost every word admitting of ambiguity.

In face of all these complications it is impossible that in the present work, which has necessarily been carried on through a number of years, inconsistencies should not occur, and that uniformity should have been always attained.

The extent of the Supplement to this Catalogue is due to the fact that several considerable acquisitions were received too late to be included in the body of the Catalogue. And as it was felt that their omission would seriously affect its value, the publication of the present volume was postponed until a supplement containing the books referred to could be compiled and printed.

For advice and assistance in the compilation of this, the largest and fullest Catalogue of Japanese Books ever printed in Europe, I owe a large debt of gratitude to Sir Ernest Satow, K.C.M.G., to Mr. Aston, to Mr. Chinsei Narahara, and to Kumagusu Minakata.

ROBERT K. DOUGLAS.
